

ABY

ACTIVE
CHANNEL
SPLITTER

Engages the “A” signal path, indicated by the BLUE LED.

Engages the “B” signal path, indicated by the WHITE LED.

The Active ABY contains two independent JFET buffers, allowing the player to split their signal while maintaining low impedance on both signal paths. The footswitch washers are color coordinated to their corresponding output jack.

5mA Consumption

Standard 2.1mm x 5.5mm power supply.

IN/OUT: 1/4 Inst. Cable
